#Professional Experience

TECH TALENT SOUTH | Full Stack Development Contractor | New Orleans, LA | Present

Trained in relevant programming technologies to gain a working knowledge of Fortune 500 company stacks.

- Worked with advanced Java concepts including control flow, loops and sorting, UML, OOP, lambdas, concurrency, TDD, and design patterns
- Built a functional Angular + Spring Boot app and deployed on Heroku successfully within a one week timeframe
- Performed Junit testing, built fully functional apps with RESTful services, and gained experience working with various API's including Google API over a 6 week period

SCRIBE AMERICA | Medical Scribe | New Orleans, LA | 2019-2020

Worked directly alongside the emergency room physicians and performed all clerical duties related to patient intake and initial care procedures.

- Developed effective workflows with small medical team in a high-stress Emergency room environment in order to maximize over 1,000 patient outcomes each week.
- Recorded EKG findings while notifying the physician of any outstanding abnormalities.
- Remained active during the outbreak of the global pandemic known as the Corona virus.

FRESINIUS KIDNEY CARE | Patient Intake Coordinator | New Orleans, LA | 2017-2019

Worked using record management technologies to properly schedule and coordinate dialysis patient visits for multiple leading kidney care facilities.

- Maintained the standard for prompt patient intake for dozens of patients each day using Salesforce, a leading customer relations software.
- Provided excellent customer service for dozens of phone inquiries daily.
- Spoke directly with partnered physicians about patient care plans and scheduling.
